

FASTER DRILLING PEAK PRODUCTIVITY

Productive underground drilling is a crucial component in achieving your production targets and meeting your required advance rates. Even the most efficient drill rig can only deliver so many meters in a shift if it's not coupled with the latest rock drill technology.

In today's volatile mining industry, every meter counts even more. Why settle for yesterday's productivity when you can drill faster and achieve better results in less time?

PERFORMANCE UPGRADES

Our performance upgrade kits enable seamless progression to the latest Sandvik technology. Each kit consists of a new rock drill and the parts to convert your existing equipment to the most technically advanced drilling technology available. Our kits can be fitted directly to your units — they include everything needed to elevate your rock drilling performance.

The quicker drilling and faster production will start a ripple effect. Your productivity and reliability will increase and you'll cut costs. Optimize your operation by upgrading your existing units to new-generation Sandvik RD-series rock drills that you can count on to deliver value 365 days a year.

Our trained service technicians will install your cost-effective performance upgrades, which are covered by our Sandvik warranty. As the original equipment manufacturer, we have an intimate understanding of the entire drilling process and the experience to engineer rock drills that work in harmony with rock tools, feeds and drill rigs.

MODERNIZE YOUR DRILLING
MAXIMIZE YOUR PROFIT

YOUR WISHES, OUR COMMAND

You rely on the latest technical advancements to help you increase production

You demand better reliability and more productivity

You need to reduce total cost of ownership

You trust time-tested technology and want to modernize your equipment in the most effective manner possible

HOW DOES IT WORK?

Our performance upgrade kits include everything you need to bring your rock drills up to date with the latest and most innovative technology. The kits help you unlock better productivity without major capital investment. All parts are engineered from high-quality materials and designed for reliable operation in challenging mining environments.

Our skilled Sandvik service technicians are trained to install the performance upgrades quickly and efficiently. You'll be drilling again in no time.

Performance upgrades are the smartest way to bring the latest R&D advancements into your operation. Rely on our end-to-end process knowledge to reduce your costs and boost your productivity every day of the year.

40%
longer shank life

Experience the benefits when you upgrade your rock drilling performance.

up to 55%

increased penetration rate,
resulting in significantly higher
production*

up to 30%

reduction in operating
costs improving total cost of
ownership*

Enhance your rock drilling.
Increase your efficiency. Save money.

Tangible improvements in overall life of rock tools and parts:

up to **17%**

longer bit life*

up to **40%**

longer shank life*

* Above improvements calculated for Sandvik RD5 series against equivalent older rock drill models
