

PRODUCT OPTIMIZATION

Obtaining the maximum life possible from your rock tools is paramount to a successful and cost-effective operation. At Sandvik, we are committed to continuous improvement and innovation of our products and since 1862, when the company was founded, we have continuously worked closely with our customers on product development to drive improvements in productivity.

By understanding the relationship between the drill rig, operator and ground conditions we can provide significant operational benefits and cost savings to your site, not only ensuring that the best total drilling cost is achieved but also providing significant productivity gains.

- Drilling Process Audit
- Product Testing
- Product Development
- Productivity Focus (Penetration Rates & Total Drill Cost)
- Hole Straightness
- Continuous Improvements
- Down-The-Hole Hammer Rebuilds
- Bit Re-grinding
