

## MY ROCK TOOLS TRACK

With Track, we digitalize our customer contracts and spend more time on adding real value and helping businesses excel.

Using Track gives increased visibility and control of the operations on site:

- real-time analysis
- performance tracking
- discard monitoring
- operational overview
- benchmarking

## MY ROCK TOOLS DRILL

Interactive customer training based on drill hole simulation, for Top Hammer, Down-The-hole and Rotary drilling.

The practical training module is designed to be mobile and used in and around drilling operations.

My Rock Tools Drill will help to demonstrates the operational impact on rock tool life and performance when using the correct settings.

## MY ROCK TOOLS ANALYZE

My Rock Tools Analyze is a mobile application designed to do failure and discard analysis of Sandvik rock tools and provide guidance on improvements - all remotely.

The aim is to determine the root cause of the failure or discard reason of the rock tool, prevent it from happening again and to help improve future performance.

It is very easy to use: you simply download the app from either App Store or Google Play, provide some key product information, take a few photos of the worn-out tool and then send it to us for analysis and feedback.

The analysis can later be used to improve drilling operations with the aim of increasing productivity and in turn, profitability.
