

DS412iE FULLY ELECTRIC ROCK BOLTER

ROCKTECHNOLOGY.SANDVIK

MAKE THE CHANGE

Sandvik DS412iE is a highly automated, productive battery powered bolter for underground mining operations and civil construction tunneling.

The bolter is equipped with an electric driveline system including a battery package and electric motor for zero emissions while tramming. Sandvik DS412iE avoids spreading emissions into the environment, reduces thermal load and thus requirements for ventilation capacity underground.

The i-Class platform offers various levels of automation for rock support drilling as well as a large component commonality through the 400i drill range.

This highly instrumented equipment ensures comprehensive data collection through the entire bolting process for better rock supporting quality in drifts and tunnels.

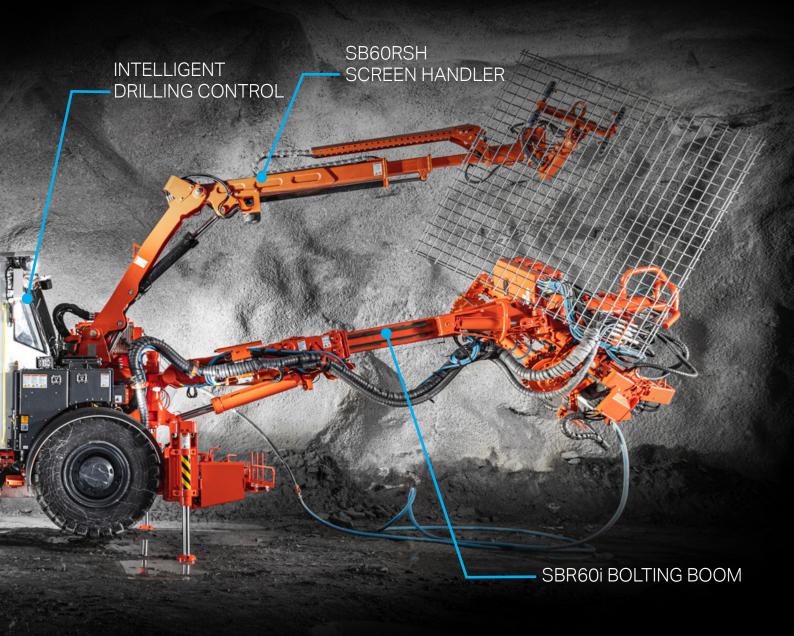

MAIN BENEFITS

FAST AND AUTOMATED ONE BOLT AUTOMATION

Sandvik DS412iE is a bolter for 4m x 4m size headings combining a safe, ergonomic working environment with high levels of automation. Equipped with a completely new carrier, a high frequency rock drill, an intelligent control system and an ergonomic cabin, the DS412iE offers high levels of safety and efficiency providing peace of mind for all rock reinforcement operations.

Up to 90%* automatic bolt installation	BETTER EFFICENCY
IMPROVED PRODUCTIVITY	Up to <mark>35%*</mark> higher penetration rate
0% diesel emissions while tramming	SAFER WORKING CONDITIONS

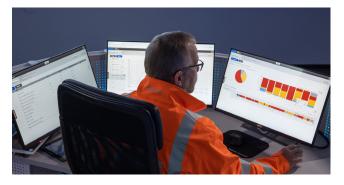

With different bolt lengths, it enables wider bolt selection for all customers. Automatic resin shooting and cement mixing system ensure high quality rock reinforcement process.

INTELLIGENT POWER MANAGEMENT SYSTEM

The charging of the batteries can be done during normal drilling cycle to ensure maximum tramming energy available all the time. It can also be used to draw additional electric power for drilling from the onboard battery pack increasing the drilling productivity without compromising the maximum peak power load taken from the mine electrics.

i-CLASS CONTROL SYSTEM

Enables advanced mine automation and future tele-remote solutions reducing the need for manual tasks. It allows integration with our digital offering like iSURE®, MySandvik Remote Monitoring Service, Optimine® and Automine®.
